

Settlement Coordination Committee

The settlement sector is a rapidly evolving sector, requiring innovative and nimble actions. With an increase in demand for services, capacity building and resources are urgently needed to better support newcomers with varied challenges and needs.

Through collaboration and sharing of expertise among Settlement Providing Organizations (SPOs), we can build settlement sector capacity and provide a more responsive and seamless settlement process for newcomers.

The committee's vision is that newcomers to Kingston have access to coordinated, effective and innovative settlement service delivery.

The Settlement Coordination Committee aims to meet monthly and:

- promotes collaboration and communication among SPOs
- aligns priorities and collectively advocates on key areas of concern for migrants
- shares best practices, service and community updates, events, activities, and resources
- shares data on service usage
