

Male Infant Circumcision

Male infant circumcision is not an OHIP covered procedure in Ontario so you will have to pay if you wish to have your baby boy circumcised. The cost for this usually ranges between \$300 to \$500. This procedure is best done within the first 6 weeks of life so if you are considering circumcision for your baby you should contact one of the clinics below as soon as possible after your baby is born. More information on circumcision can be found on [this website](#).

Here is a list of clinics offering infant circumcision:

Kingston

[Portsmouth Medical Clinic \(Dr Baran\)](#)

613 546-2321
